

PINELLAS COUNTY PLUMBING & GAS DIVISION

SECOND ROUGH PLUMBING INSPECTION LESS TUB(S)

Permit Number _____

Job Address _____

This is the only item keeping me from passing second rough inspection.

I request the second rough plumbing inspection be signed off on the placard without the bathtub or whirlpool bathtub installed so I can receive a framing inspection.

I will not allow any part of the fixture(s), drain, supports, pump and water piping to be concealed prior to passing inspection.

If any part of the installation gets concealed prior to inspection I will have it uncovered at my expense.

The tub(s) must be called for inspection before any finished (tile,marble,etc.) surfaces are installed. This will give the inspector access to the tub and finished surfaces will not need to be removed.This inspection may be done as part of the second rough, but must be done before finished surfaces are installed, and before final inspection. Fixtures with concealed slip-joint connections require access per Section 405.8. Access shall be provided to the pump.

Building Contractors Or Authorized Representative Signature _____

Print Name _____

Date: _____ Ph: _____

This form must be completed and returned (Fax 464-5021) prior to requesting second rough inspection or given to the inspector on the job site.

**Pinellas County Building Department
310 Court St.
Clearwater, Fl. 33756**

**Ph: 464-3241
Fax: 464-5021**

At your option the tub may be filled with water on the job site and before it is set in place to verify the piping installed at the factory does not leak. Call for tub inspection. After the tub is installed the drain and water supply connections installed on site must be inspected.
